

# Introducing the **NIGHTWATCHER** 760 PRO Wi-Fi

## Night Watcher Pro Wi-Fi

- LED light source 1 x 11W AC LED Power Chip
- Colour camera with Wi-Fi connectivity for In-home or Remote Monitoring
- Robotic head function that auto rotates the LED head towards any of the 3 motion sensor zones on detection to illuminate the activity
- Intelligent PIR Motion Sensor with 220° detection zone
- 4GB SD Card (upgradeable to 32GB) can record 500 events

### Robotic monitoring 24/7

When motion is detected, the motorized LED light points in the direction of the motion. As motion moves across the detection zone, the light will follow.

### Never miss a moment

Night Watcher will detect motion sensor activities and send reports directly to your smartphone while recording the event onto a removable SD card for later playback.

### Be there now

Whether your on a different continent or around the block, Night Watcher lets you see what's going on in your space - and lets you know who's been standing in your doorway. Watch free live streaming video via iOS, Android and web apps anytime, anywhere.

### Connect with family

See that the kids get home safely, or, watch them playing from your smartphone. Night Watcher captures the good stuff and helps prevent the bad.

### Large monitoring range

Large 50" range 220PIR detection area with 3 detection zones.

### Feel safe and secure

The unknown can be scary, but no one should be afraid in their own home. Night Watcher lets you know everything is safe before you even open the front door.
